Dear Dave:

Please accept our heartfelt thanks for the tremendous job you and your crew did on the A.W. Beattie Career Center renovation and expansion project over the past 20 months. You and your sub contractors were professional and cooperative during the entire project. I realize it was a big job to tackle since the current structure was close to 50 years old and had not been updated since it was built. Working on a career and technical center is much more of a challenge than doing a regular educational facility which only has classrooms. Some of the labs involved a tremendous amount of planning coordination. The fact that we were able to conduct classes during the entire project meant a great deal to our staff and students.

The students benefitted not only by having a new structure where they can learn, but the fact that they were able to see firsthand your trades people at work was an inspiration to most of them. It was also a great learning experience for them.

It is great to be done on time and under budget with this project. The guidance and coordination of Uhl Construction made it all possible and it is appreciated. If we can ever serve as a reference for you do not hesitate to contact me in the future.

Sincerely,

Kathryn B. Ingram
