

To Whom It May Concern:

Uhl Construction Company has worked with The Alta Group, Inc. over the past 10 years. They have designed and built several buildings for Alta during our expansions totaling over 100,000 square feet. Uhl has the expertise to construct any type of building from clearspan metal manufacturing to an elaborate office building. Alta continues to work with Uhl on most all construction projects because of the service, quality and reliability. They are always there to handle any issue that may arise. Uhl is a complete industrial contractor with the ability to build the building or install equipment. It is a pleasure working with such a competent and honest supplier.

Sincerely,

Ed DeMajo
Engineering Manager
