To Whom It May Concern:

Re Letter of Recommendation---Uhl Construction Company

It is with pleasure that I write this letter of commendation for Uhl Construction reflecting the very high level of satisfaction that IDL experienced in demolition and reconstruction of key parts of our manufacturing facility in East Butler, PA.

This project required considerable skill and creativity because it not only was establishing a manufacturing platform for making Point of Purchase Displays, but additionally it was creating that first impression to our clients who visit IDL to determine if we will be the Company that they want to engage and entrust to work on their designs for a new product roll out or a make over of existing products.

In addition to the client relationship, this construction was under a very tight timetable in order to meet the targeted deadlines for vacating our old premises and to get up and running to meet our clients' delivery dates. Thanks to the dedication and determination of Uhl Construction, and specifically their Project Manager, David Hengelsberg, IDL was able to meet all of its objectives, on time and within budget.

I wholeheartedly recommend Uhl Construction for any of your construction needs and assure you that for any future IDL projects, we will look first to Uhl to see if they can fit us into their busy schedule.

Sincerely,

Stanley L. Foster
Project Manager,
IDL Worldwide
