

April 28, 1998

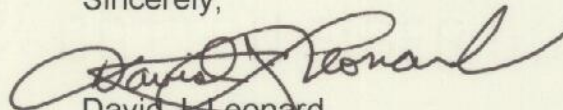

To whom it may concern:

Sauereisen contracted with UHL Construction Company to design and construct an additional plant facility of approximately 22,500 sq. ft. at our 160 Gamma Drive location, as well as to remodel several portions of our existing facility. We are extremely satisfied with the result of this contract and UHL's performance for the following reasons:

- **Time Frame**. The project was completed within our time frame, even though weather during the construction period was not very cooperative.
- **Cost**. All activities were completed within project scope, and all change orders were truly comprised of added features or options.
- **Performance**. UHL personnel involved with the project were extremely competent, organized and dedicated to the success of the project.
- **Communication**. UHL's project superintendent was in contact with our project manager at all times, and weekly progress meetings were held between UHL and Sauereisen representatives.

Sauereisen is pleased to provide this letter of recommendation for UHL Construction Company. For service, quality and professionalism, UHL is our contractor of choice.

Sincerely,

David J. Leonard
VP - Finance
