UHL Construction
P. O. Box 8
Allison Park, PA 15101

Dear Sirs:

Please be advised the UHL Construction Company recently completed a project for us at our Creighton, Pennsylvania warehouse complex. The project was a 30,000 square foot, climate controlled warehouse complete with a 7,500 square foot mezzanine, loading docks, office and bathrooms. UHL Construction acted as general contractor and performed all the work from foundation excavation to cement finish for floors.

Our project was bid on by five separate contractors. UHL was chosen based on their overall bid presentation, working knowledge and reputation in the industry. Once construction began, Mr. Tim Hengelsberg was our point of contact and project manager.

Without any reservation, I recommend UHL Construction to any person or company considering a building project. UHL Construction generally, and Mr. Tim Hengelsberg, specifically were extremely fair and honest in their work effort. Other than non-preventable delays, the project was completed as expected and was within budget. We are extremely happy with our new warehouse and enjoyed the relationship we had with UHL Construction during our project life.

Again, I would, without reservation, recommend UHL Construction for work. I would be happy to discuss this letter of recommendation with you personally. Thank you.

Very truly yours,

WELESKI ENTERPRISES, INC.

Michael J. Chick
General Manager
